## At Glacier Regular

Font family      400

**About**

At Glacier is a confident step into the raw wilderness of type design, crafted by the über-talented graphic designer and printer Omar Careaga. Bold features, smart structure; ice-cold elegance with glacial flow. A natural grotty, carved by instinct. Untamed. Elemental. The rare thrill of encountering something truly one of a kind.

Rooted in the wild, yet made for control, At Glacier includes over 1,000 glyphs: a rich set of alternates, ligatures, numerals, symbols, arrows, dingbats, and advanced OpenType features. A complete creative toolkit — all in one font.

**Desktop installation guide**

### On a Mac

To activate a font, simply drag the font files into the Fonts folder, which is located inside the Library folder here: `Macintosh HD > Library > Fonts` Alternatively you can install the fonts with Font Book, a free application with macOS. More information, on the support section of the Apple website.

### On a PC

Right-click the font files and select "Install" from the drop-down menu. In order to access the newly installed fonts, you have to re-start any application you have been using. Note that this "Install" function will create a copy of the selected fonts in the system's "Fonts" folder.

**Web usage guide**

### CSS @font-face

Upload .woff and .woff2 web fonts to your web server. Copy the code snippet example below into your CSS file to address your web fonts. Replace the example file URL with the appropriate path to the font files on your server.

```
@font-face {
  font-family: 'FontName';
  src: url('path/Font-Regular.woff2') format('woff2'),
       url('path/Font-Regular.woff') format('woff');
}
```

### HTML embed

You can reference your font family in CSS font stacks by the name you gave it, in the same way you would for a system font.

```
html-element {
    font-family: 'FontName', sans-serif;
}
```
